RETRACTION NOTE

Retraction Note: Intracerebroventricular streptozotocin administration impairs mitochondrial calcium homeostasis and bioenergetics in memory-sensitive rat brain regions

The Editors-in-Chief have retracted this article. After publication, concerns were raised regarding similarity between the rat data presented in Fig. 7 and Swiss mouse data in Fig. 8 of another article from the same author group that was under consideration in a different journal within a similar time frame (Semwal and Garabadu 2020). Additionally, a number of western blots included in the figures appear problematic, specifically:

A number of western blot bands in Fig. 9a appear highly similar.
A number of western blot bands in Fig. 10a also appear highly similar.
Figure 11a appears to contain highly similar western blot bands and vertical breaks in the backgrounds.
Figures 9–11 all appear to have the same b-actin blots.
The authors have stated that the raw data are not presently available.

The Editors-in-Chief therefore no longer have confidence in the presented data.

The authors do not agree to this retraction.
