RETRACTION NOTE

Retraction Note: Roflumilast Reduces Pathological Symptoms of Sporadic Alzheimer's Disease in Rats Produced by Intracerebroventricular Streptozotocin by Inhibiting NF-κB/BACE-1 Mediated Aβ Production in the Hippocampus and Activating the cAMP/BDNF Signalling Pathway

The Editor-in-Chief has retracted this article. After publication, concerns were raised regarding highly similar images between Fig. 10 in this article and Fig. 4 in an earlier article from the same group [1], as well as overlapping images between different treatment groups within the figure. The authors have provided a revised figure and raw data for validation; however, further checks by the Publisher found further cases of highly similar images among the raw data files.

The Editor-in-Chief therefore no longer has confidence in the presented data.

None of the authors have responded to any correspondence from the editor or publisher about this retraction notice.
